

# **Assignment 01**

**United International University**  
**Department of Computer Science and Engineering**  
Course Code: MATH 2205 | Course name: Probability and Statistics  
Report Writing

## **Report Format:**

1. Write an introductory paragraph summarizing the importance of data presentation and analysis in various fields.
2. Present your findings for each topic in a clear and organized manner.
3. Include relevant examples and explain the steps taken to perform the calculations.
4. Discuss the practical applications of the concepts covered.
5. Conclude the report with a summary of key takeaways from each section.

## **Submission Guidelines:**

1. Submit your report as a well-organized document (PDF or Word).
2. Clearly label each section with the corresponding topic.
3. Include necessary calculations and explanations.
4. Provide any charts, diagrams, or graphs used to illustrate your points.
5. Ensure proper citation if you refer to external sources.
